The Transportation Authority of Marin (TAM) is conducting outreach efforts to identify community needs and priorities and to clarify issues and concerns related to congestion and multi-modal transportation access along the Highway 101 Greenbrae Corridor. We are seeking your input in identifying these needs and issues and developing a vision for future improvements.

The Greenbrae Corridor extends from south of the Tamalpais Drive overcrossing in Corte Madera north to the Highway 101 / I-580 Interchange in San Rafael. Currently, the existing roadway design and spacing between interchanges does not meet design standards leading to conflicts with weaving and merging traffic and higher than average accident rates. Traffic on local streets has increased as the congestion on Highway 101 has increased – and expected traffic growth will only exacerbate the problem. TAM is also looking at how improvements to the I-580 connection may potentially help address traffic operations in the corridor.

We are scheduling interviews with a variety of stakeholders to better identify and clarify the community interests and issues and determine how best to engage the larger community in this project.

Because you are a key stakeholder representing local interests, a project team member will contact you soon to schedule a meeting with representatives from the project team and potentially other community representatives. Interviews will take 45 to 60 minutes and will consist of a brief project overview/history followed by several questions and discussion topics.

Input you provide will be summarized as part of a comprehensive public outreach plan currently being prepared. If you have any questions please contact me at (415) 507-2810 or email at BWhitney@co.marin.ca.us. Thank you in advance for your assistance and participation.

Sincerely,
Bill Whitney, P.E.
TAM Project Manager
